About Myself

As a passionate and dedicated junior web developer with a specialization in Laravel, I bring a strong foundation in web development and a commitment to delivering high-quality, user-friendly web applications. My proficiency in PHP, HTML, CSS, and JavaScript allows me to create dynamic and responsive web applications. I am dedicated to staying up to date on new technologies. I am highly motivated and constantly seeking new challenges to improve my skills, knowledge and never give-up any of my duties.

Work Experience

Web Code Care

Web Developer Intern

Jul 2023 – Sep 2023

- Developed responsive and visually stunning websites using HTML, CSS, Sass, Bootstrap, JavaScript, jQuery.
- Learn Laravel framework including its key components like routing, controllers, models, views.
- Understand Laravel's blade templating and how to create dynamic, data-driven views.
- Learn MVC pattern and explore database migrations and relationship in Eloquent.
- Understand how to interact with APIs and services. Learn how to make HTTP request, handle JSON data.
- Gain proficiency in using version control system like Git including branching, merging and collaborating with team members.
- Enhance communication, problem-solving and adaptability skills for a dynamic environment.

Web Code Care

Junior Web Developer

Oct 2023 – Present

- Worked on 7+ live project and managed 2 projects from first to last.
- Fixing design issues and responsiveness in multiple projects with client satisfaction.
- Implement **squareup** payment gateway in a project.
- Learn about Google Search Console and Google Analytics.

Personal Projects

Mess Management System

It is a project to track about all-of the records for each mess member. Admin can admit a user and remove user. He can also entry a meal, bazar-details, extra-costs and all necessary things. Each user has own profile and he can see all-of his records and others. It gives a final estimation for each user.

- **Language:** HTML5, CSS3, JavaScript, SQL, PHP
- **Database:** MySQL
- **Framework:** Bootstrap
- [GitHub-Link](#)
